

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

From January 15, 1889, to April 1, 1889, two and one-half months, I received and paid to the State Treasurer, the sum of \$4,118.10.

Total amount of fees received and paid to the State Treasurer, from January 15, 1889, the date on which I assumed the duties of my office, to October 1, 1892, \$84,668.56.

I have also collected to this date and paid to the State Treasurer, for rent on dwelling house owned by the State, the sum of \$1,575 00.

Total amount of money received and paid to the State Treasurer to date, \$86,243.56.

PRINTING.

At the date of my report two years ago, there remained on hand a balance of \$7,082.38 in the Printing Fund; this amount was not sufficient to meet the expenses for the public printing before the next regular appropriation would be available, and when the 37th General Assembly convened it became necessary to ask for an appropriation of \$15,000, to defray the expenses of the public printing until July 1, 1891, when the regular appropriation would become available. This deficiency in the Printing Fund, as stated in my report two years ago, was caused by the extraordinary amount of printing to be done, and which my predecessor was unable to have done on account of the litigation between the Commissioners of State Contracts and the contractor for the public printing, and in consequence of which about \$14,000 of the amount then on hand lapsed into the treasury. The 37th General Assembly made the usual appropriation of \$30,000 for the two years commencing July 1, 1891. Of this sum there remains on hand, in the treasury, October 1, 1892, the sum of \$9,804.74. Included in this report will be found a full itemized statement of the appropriation and expenditures on account of the public printing.

BINDING.

On the date of my report two years ago, there remained on hand a balance of \$4.566.07 in the Binding Fund; this amount being insufficient to defray the expenses of the public binding until July 1, 1891, the 37th General Assembly appropriated

the sum of \$10,000, to be used until the regular appropriation would become available. This deficiency in the Binding Fund, as stated in my report two years ago, was caused by the great amount of binding I was required to have done on account of the litigation during the term of my predecessor in regard to the Printing Fund, and which delayed the binding until I came into office. There remains on hand at this date the sum of \$14,543.12, which will be sufficient to pay for all the binding until July 1, 1893, when the regular biennial appropriation will become available.

PAPER AND STATIONERY.

On the date of my last report, two years ago, there remained on hand a balance of \$16,248.20 in the fund for paper and stationery. On this date the new contracts went into effect for the ensuing two years, and the above amount being insufficient to defray the expenses for the purchase of printing paper and stationery until July 1, 1891, the 37th General Assembly appropriated the sum of \$3,000, to be used until the regular appropriation would become available.

The itemized account in the succeeding pages shows the amount of paper and stationery bought, and for what purpose.

The contract of 1890 was for 5,000 reams of printing paper; but only about 4,000 reams have been used. There remains on hand to the credit of this fund, for printing paper and stationery, the sum of \$20,403.42. The appropriation of \$13,000 per annum, being the amount appropriated by the 37th General Assembly, will be ample to meet the expenses for this purpose

HEATING.

The usual appropriation of \$15,000 per annum was granted by the last General Assembly, of which there is now on hand the sum of \$13,958.36, which sum will be sufficient to meet the expenses of the department until the next regular appropriation can be used.

THE INDEX DEPARTMENT AND DOCUMENT LIBRARY.

What has been said in former reports concerning the utility of the index department of this office may be repeated here with emphasis. The additional labor imposed upon the Secretary of State by the passage of the Australian ballot law, has materially devolved upon the clerks in this department. Much of their time during the past year has been taken up with these The nature of this service was entirely new and new duties. without precedent in this State. The manner in which this work has been performed has, I think, met with general approval. The current work of the department has been unusually heavy since the adjournment of the 37th General Assembly. The journals of the regular session number 2,630 printed pages, considerably more than in recent years, and the labor of comparing the copy for the public printer and preparing the index to the printed volumes was much greater than usual. The high standard of excellence in the system of indexing the public documents of this State is being improved upon each year, if possible, and it can be said, without disparaging the work of other states that no State in the Union excels Illinois in the convenience or comprehension of its system of indexing.

At the close of my former report the clerks in this department were engaged in classifying the old executive files and election returns. This work has been completed and these files are now in excellent order and in good condition. The demand upon this office for evidence to complete title to lands sold and conveyed by the State on Internal Improvement and Canal account, has made a tract index to these lands a necessity. The index to the Canal lands is practically complete and is found to be a great convenience. The memoranda for the index to the Internal Improvement lands has been fairly begun. When this index is completed it will be of great value for the purpose intended. When it is considered that the lands sold and conveyed by the State in the Canal and Internal Improvement accounts,

comprise in round numbers, about one million acres, and that many of the original purchasers were indifferent or negligent about having their patents recorded, the importance of this matter becomes apparent.

A catalogue of the document library has been partially prepared, but on account of more pressing demands, could not be completed in time to publish with this report as intended. A few valuable volumes have been added to the library by purchase and donation, since my previous report, but I am sorry to say that it has not been my good fortune to procure some missing original documents mentioned in former reports, so desirable to recover.

Included in this report find itemized statements of appropriations disbursed under my direction, also amounts of balances of appropriations which were not used and lapsed into the State treasury.

Respectfully submitted, I. N. Pearson, Secretary of State.
